

## Wireframe, Mobile

I created a few wireframes to plan the layout. The homepage is more complex so I broke it down into sections. The homepage focuses on conversion elements like CTAs and advantages of the service. It also includes a palette preview carousel with a link to the Gallery page to see the full selection. In the footer we highlight more details about the service hours and contact info.

The contact page features a contact form with the global footer

### Homepage:

#### Header

#### Section 1: How it works

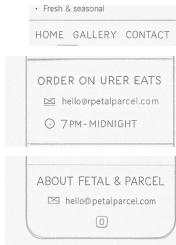

#### Section 2: Palette Preview

#### Section 3: Why we are different

#### Section 4: Footer Navigation, Order CTA, About, Contact

### Contact Page:
